

# TEST CORRECTIONS

1. The purpose of correcting your test is to make sure you understand the content that was found on the test. When you miss a question hopefully you're wondering what the correct answer is and why it is the correct answer. Following the steps below to correct your test and earn back the **full** points you missed.

Step 1: Write down the question you answered incorrectly.

Step 2: Write down your incorrect response and how you came to choose that answer.

Step 3: Write down what the correct answer actually is.

Step 4: Write down the rationale as to why the answer is correct.

2. When you have completed this, you are then eligible to retake the test. I have a different version for you. You must come to me and schedule a time to retake the test.
3. The score you receive on the **second** test will be your **final** test score.
